

Real Estate Market Trends Dashboard

Project Documentation for LinkedIn & Portfolio Showcase

Project Objective:

Develop an advanced Real Estate Market Trends Dashboard to analyze property market dynamics for investment and development decisions. The dashboard provides insights into property prices, rental yields, demand-supply conditions, and geographical market hotspots using interactive visualizations.

Key Features

Feature	Description
Property Price Analysis	Track residential and commercial property price trends over time.
Rental Yield Insights	Analyze rental income potential and investment returns.
Demand & Supply Tracking	Monitor market demand, property availability, and occupancy rates.
Economic Indicators	Evaluate interest rates, inflation, and economic growth impact on real estate.
Heat Map Visualization	Identify high-growth locations and market hotspots using geographic heat maps.
Interactive Power BI Dashboard	Provide dynamic filtering, KPI cards, charts, and drill-down reports.

Technology Stack

- Dashboard Tool: Power BI
- Data Processing: Python / SQL
- Database: MySQL / PostgreSQL
- Visualization: Maps, Heat Maps, Trend Charts, KPI Cards
- Data Sources: Real Estate Listings, Economic Data, Market Reports

Business Benefits

- Helps investors identify profitable real estate opportunities.
- Provides deep insights into market growth and investment trends.
- Assists developers in understanding demand and supply gaps.
- Enables data-driven decisions with real-time analytics.
- Supports strategic planning using geographical visualizations.

Deliverable

An interactive Power BI report designed to provide comprehensive insights into real estate market trends, property performance, investment potential, and geographical market analysis.

LinkedIn Post Caption

Excited to showcase my latest project: **Real Estate Market Trends Dashboard ■■■**

This interactive Power BI dashboard analyzes property prices, rental yields, market demand, supply conditions, and economic indicators to support smarter investment decisions.

- Property Price Analysis
- Rental Yield Tracking
- Heat Map Visualization
- Market Demand & Supply Insights
- Interactive Power BI Reporting

This project enhanced my skills in data visualization, business intelligence, and market analytics.
